

A better neutralized vitamin c

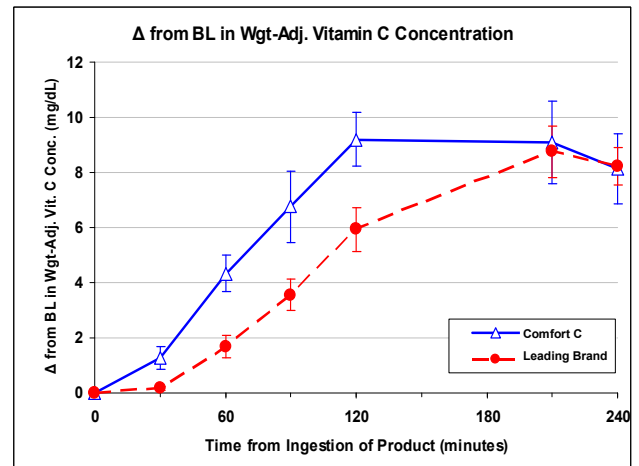

Key Benefits

- Clinically validated
Faster uptake and absorption
Highly bioavailable
Easy on the digestive system
Patent pending composition
Employs proprietary Alkemy biphasic granulation process
Uniform, directly compressible granules for faster tableting
GMO-free, contains no animal products, Kosher certified
Manufactured in an FDA validated facility under strict cGMPs

COMFORT C®, PREMIUM VITAMIN C, OUTPERFORMS THE CATEGORY LEADER IN RECENT CLINICAL TRIALS!

Based on the Alkemy™ technology platform, Comfort C combines a proprietary blend of proven alkalizing agents with ultra low lead USP calcium carbonate, producing a powerful delivery system for vitamin C in the body – as shown by two double-blind, comparator, cross-over clinical studies.

The patent pending composition was tested against the leading brand and results revealed vitamin C changes from baseline were noticeably higher and rose faster with Comfort C! Additionally, vitamin C concentration was 35% greater for Comfort C than the category leader, while the rates of elimination were statistically equivalent. This signifies that Comfort C not only provides one of the most important antioxidant's for the prevention of free-radical damage, but Comfort C provides it faster and to a greater extent than the leading brand!

Comfort C is backed by science and offers a truly value-added, superior alternative for buffered and acid-reduced vitamin C consumers. Find out more about this fast acting, stomach friendly and highly bioavailable form of vitamin C – contact Scientific Food Solutions or your E.T. Horn representative today!

A better neutralized vitamin c

ITEM NUMBER: ARX07

DESCRIPTION: Comfort C[®] is a creamy white, uniform alkaline granule that is tasteless and odorless, and is manufactured to food / supplement grade standards.

COMPOSITION: Ascorbic Acid, USP Grade Ultra White Calcium Carbonate, Magnesium Hydroxide, Gum Acacia, Dicalcium Phosphate, Potassium Hydroxide, Bioperine[®]

PATENTS: Patents pending

COUNTRY OF ORIGIN: United States of America

PARTICLE SIZE

Through #16 Mesh
Through #20 Mesh
Retained on #60 Mesh
Retained on #200 Mesh
Pan

SPECIFICATION

100%
≥ 99.0%
≤ 65.0%
